Foreword

Saudi Food and Drug Authority (SFDA) is an independent organization with main purpose of regulating and monitoring of foods, drugs and medical devices. One of SFDA functions is to issue national Standards /Technical Regulation in the fields of foods, drugs and medical devices, whether imported or manufactured locally, through specialized technical committees (TCs). SFDA medical devices sector through the work program of technical committee (SFDA/MDS/TC 84) "Devices for administration of medicinal products and catheters" has adopted the International Standard No.(ISO 7864:2016) "Sterile hypodermic needles for single use — Requirements and test methods", issued by "International Organization for Standardization" in its original language. This standard is adopted with modifications in its original language and has been approved as national standard by SFDA board of directors in its meeting No () Held on (// AH), agreed with (// G).

- The modifications are mentioned in the Modifications Annex.

Scope

This International Standard specifies requirements for sterile hypodermic needles for single use of designated metric sizes 0,18 mm to 1,2 mm.

It does not apply to those devices that are covered by their own standard such as dental needles and pen needles.
